

# Scientific Program

Join us at LUPUS 2025 for an insightful program featuring the latest lupus and autoimmune research advancements. Explore diverse sessions, from debates on cutting-edge treatments to patient-centered discussions on mental health, fertility, and access to care. With sessions on drug trial innovations, neuropsychiatric and pediatric lupus, and specialized meet-the-professor talks, this conference will bridge interdisciplinary insights to transform lupus care and research. Get a glimpse of the session types that will be explored at LUPUS 2025. [See Here](#) Explore the interactive program and see what awaits at LUPUS 2025. Meet-the-Professor Sessions

Abstract Concurrent Sessions

Featuring distinguished speakers, these flagship presentations highlight transformative topics in lupus research and

practice, setting the stage for future breakthroughs and collaborations. These dynamic sessions feature experts engaging in thought-provoking discussions on controversial topics in lupus care, providing diverse perspectives to challenge and inform attendees. Audience interaction is encouraged, fostering a deeper understanding of the issues. These sessions focus on the lived experiences of lupus patients, exploring care strategies, support systems, and the patient journey to inspire improvements in holistic care delivery. A highly interactive format where participants and experts engage in open, roundtable-style conversations, encouraging spontaneous dialogue and innovative problem-solving on pressing lupus-related issues. Intimate, mentor-led discussions provide a unique opportunity for attendees to interact with leading experts, gain personalized insights, and deepen their expertise in specific areas of lupus study and treatment. Cutting-edge research findings and clinical advancements are presented, offering attendees the latest insights into lupus mechanisms, diagnostics, and treatments from leading scientists and clinicians.
